Project Details

Project –1

| | |
|----------|------------------------------|
| Client | : Getinge AB, Germany |
| Duration | : December 2021 to till date |

- Handled Change Requests as part of SAP Global Support team in ABAP.
- Apart from the development activities was part of Incident support for the all the modules (MM, SD, FI, CS and QM).
- Worked on fine tuning long running custom Z programs as part of SAP Performance Optimization initiative.
- Had regular knowledge sharing sessions within team for improvement in service quality and advancement of team capability.
- Designed a SALV report which will have all the delivery information related to sales org along with invoice and order details linked to the delivery. Mail functionality added to the report with data as excel attachment along with another attachment of adobe form. The report will be executed in the foreground and background also.

Project –2

| | |
|----------|---------------------------|
| Client | : Roche GPDM, Germany |
| Duration | : May 2024 to August 2024 |

- Worked as the sole developer for the project.
- Implemented interfaces which will pick the data from SAP and store the files in application server so that other support team can pick the files from there.
- Closely worked with client in requirement gathering, analysis, providing solutions and created custom DDIC objects for storing GPDM specific data.

Project –3

Client : Tata Consumer Products Limited (TCPL), India
Duration : June 2021 to November 2021

- Worked for Tata consultancy service through Teamware solutions for TCPL project.
- This is a migration project from ABAP to S/4 HANA system.
- Remediated reports, module pool programs and SAPSCRIPTS and smart forms.
- Worked extensively on fixes for one of the migration projects solely.
- Worked closely with functional and testing team for getting the requirements and successfully completed that migration work.

Project –4

Client : McKesson, USA
Duration : January 2018 to March 2020

- Worked as an SAP ABAP AMS consultant for leading American Pharmaceutical company.
- Developed RICEF objects for the new processes and changes to existing processes. Communicate with the functional to get the details.
- Worked with OOPS ABAP concepts while developing custom reports and BADIs.
- Debugged extensively in SAP SD, MM, FI and Vistex modules for production issues. Worked closely with business on priority issues.
- Worked on performance improvements of existing old objects with the help of traces and analysing time-consuming statements or logics.

Project –5

Client : Allianz Global Investors
Duration : January 2017 to December 2017

- This is an implementation/rollout project.
- I worked as Jr. Developer in this project.
- The main objects I worked went go-live on 1st Jan 2018 and they are successful.
- Worked on DDIC objects.
- Worked on FICO modules. Worked on interfaces using AL11 (application layer).
- Worked on ALV reports using OOPS and Classical reports changes.
- Developed a complex Inbound Interface which interface fetch the data from application server which is middleware. Post data fetching, we do validation and mapping of the data, TAX calculations if required, fill the internal tables required to post the documents using BAPI_ACC_DOCUMENT_POST
- Developed outbound interfaces and report programs.
